

MAKE THE CONNECTION

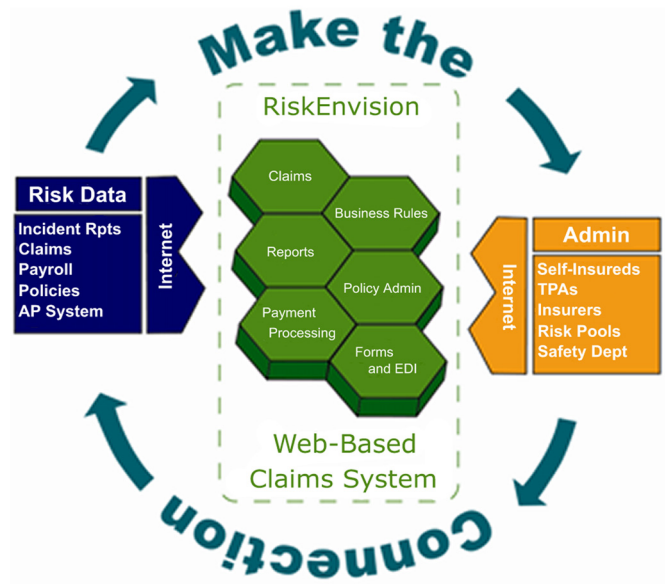

RiskEnvision 4.0

WEB-BASED CLAIMS AND RISK MANAGEMENT

“Designed by Risk Managers for Risk Managers” is every RMIS's claim. Unless that Risk Manager was you, it probably isn't exactly what you are looking for. That's why RiskEnvision 4.0 is completely configurable. Add new panels. Add new fields to existing panels. Add your own business rules. With RiskEnvision 4.0, the web-based version of our award-winning RMIS, you *are* the designer.

RiskEnvision is a web-based, modular, enterprise-level property and casualty Risk Management Information System. It supports the full breadth of claims administration functions including payment processing, reserves, diary, form letters and correspondence, policy management, reporting and more for Auto, General, Health Professional, Product, Property, and Workers Compensation lines of coverage.

- You can modify existing screens or build new screens - no custom programming needed
- You define your own business rules: determine triggering events and their resulting actions
- Define by customer interest user groups the way the system looks, what types of information can be viewed, what financial functions the system can perform.
- Add as many customer user-defined fields as you like.
- You identify fields that will be required for claim saving
- Our reports are based on Business Objects Crystal Reports, the industry standard in business application reporting - choose from nearly 100 standard reports, customize them, or build your own
- The RiskEnvision Active Claim panel lets users jump quickly to any information in the claim
- RiskEnvision is available as an ASP solution

Connect with the Benefits of Service Oriented Architecture (SOA)

RiskEnvision 4.0 is a 100% browser based system written in Java. The web-based architecture offers you an application with very little maintenance overhead. There is no client software to install. The user can use the application from anywhere in the world with an Internet connection and a standard web browser. The SOA approach provides a modular system where you can purchase just the solutions you need and those components can interact and integrate with your existing systems.
